

What is claimed is:

1. A novelty flexible topper, comprising:  
a flexible housing forming a chamber for containing a novelty toy; and  
a topper securement operatively engaged to said flexible housing.
2. The flexible topper according to claim 1 wherein said topper securement is positioned on an end region of a cylindrical body having a longitudinal bore.
3. The flexible topper according to claim 1 wherein said chamber is fluid-filled.
4. The flexible topper according to claim 1 wherein said topper securement is positioned on a bubble dispenser.

5. A combination writing device and novelty flexible topper, comprising:

a cylindrical body having a longitudinal bore and an end region;

a writing member including a tip and a writing supply incorporated in said longitudinal bore;

a flexible housing forming a chamber for containing a novelty toy, said flexible housing operatively engaged to a topper securement, said topper securement positioned on said end region; and

wherein said chamber is fluid-filled.

6. A novelty flexible topper, comprising:

a flexible housing forming a chamber for containing a novelty toy; and

a connector for engaging a dispensing device, said connector attaching to said flexible housing and sealing said chamber.

7. The flexible topper according to claim 6 wherein said chamber is fluid-filled.
